

**BULK EXPANDED POLYSTYRENE (EPS) FOAM SCRAP
RECYCLING ACCEPTANCE TERMS AND POLICY**

BENCHMARK FOAM, INC. will accept bulk quantities of scrap EPS foam at its manufacturing facility for recycling on the following terms:

- Only EPS foam will be accepted. EPS is readily identified by its white bead/cell structure. Extruded Polystyrene (XPS: Blue Dow, Pink Foamular, Yellow Certifoam) does not have this cell structure, therefore, cannot be recycled by Benchmark Foam.
- The EPS foam must be in a clean, dry condition. The scrap should not include dirt, paper/cardboard, food waste, glue adhesives or other plastic materials. If there is any doubt about the cleanliness of the scrap, it will be rejected and a disposal fee may apply.
- The scrap EPS should be of a size that is easily handled by one person. Oversized material that requires additional handling may incur fees.
- The scrap is to be delivered to the facility location listed below at no cost to Benchmark Foam. If the scrap EPS meets the bulk recycling terms stated here, it will be accepted and recycled at no cost to the customer.
- If pre-qualified, Benchmark Foam may agree to pick up scrap EPS. However, there may be fees or surcharges if Benchmark Foam provides a pickup or freight service to haul the scrap EPS to the manufacturing/recycling center.
- Benchmark Foam reserves the right to reject all material, at its discretion.
- Benchmark Foam's manufacturing facility/recycling center is located at:
401 Pheasant Ridge Drive
Watertown, SD 57201

Caring for the environment through recycling is important to Benchmark Foam. We welcome the opportunity to work closely with you to make responsible choices to recycle EPS.

Regards,

Tom Devine
Chairman
